EDUCATION

High School

Electrical technician of computers, 2010 - 2014, Loznica

Aleph ICT

Web programming full stack training and computer software engineering course, March 2017 - January 2018, Novi Sad

EXPERIENCE

Elanwave website (December 2018. – May 2019.)

Project role - Software developer

The improvement of first version of the Elanwave's website. The idea for the website was for it to be interactive, in the sense that the company needed a way to communicate with clients and future employees and to generate a strong online brand identity. Also the website had to be esthetically pleasing, follow the company's branding and to be user friendly.

Timesheet (November 2018. – December 2018.)

Project role - QA Engineer

The main goal of application is time tracking of employees and calculation of company income. Each employee in the system has its own timesheet to track time spent on the ongoing projects. Each manager in the system is responsible for approving or rejecting employee's timesheets.
